REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Applicant has claimed uniquely distinct features which are not found in the prior art, either singularly or in combination. The present invention is a method of authenticating a security device to determine if it is authorized to be used with the security system. The security system has a control panel and a plurality of security devices interconnected to the control panel over a communications medium located in a premises. A first encryption key and a second encryption key are stored in the control panel and in the security device. A challenge index, such as a random number, is generated at the control panel, and a challenge message is produced by encrypting the challenge index using the first encryption key and including the encrypted challenge index in the challenge message. The challenge message is then transmitted over the communications medium to and received by the security device.

These features are not found or suggested in the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas R. Peeso whose telephone number is 571 272-
